

Principal - Mr. Michael Chiodo

Vice Principal - Ms. Mindy McCall

Woodrow Wilson School has a time earned reputation as a top performing school within the New Brunswick Public School District. Our staff of 45 certified professionals is striving to reflect our District Mission by “preparing, inspiring, and empowering lifelong learners and leaders.” At Woodrow Wilson we strive to fulfill our District Vision by “inspiring students to become engaged in their own learning... and to develop their creative problem-solving and critical thinking skills.” We are the home of the proud to be the home of the Woodrow Wilson Eagles!

Woodrow Wilson is a proud recipient of New Jersey's Future Ready Schools Bronze recognition. This recognition is based on both school technology and innovative instructional practices. We strive to be forward thinking in our approach to education and promote critical thinking and reasoning for all of our students. A partnership among the school, its families and the Woodrow Wilson community-at-large also contributes to the school's success.

Students at Woodrow Wilson are training to be 21st Century Learners through interaction with strong, research-based curricula that are aligned with the New Jersey Student Learning Standards, use of technology, and opportunities to solve real-world problems through inquiry-based learning. Teachers at Woodrow Wilson work to develop effective teaching practices to ensure that the varied and unique gifts, modalities and intelligences of students are addressed. The school's collegial and dedicated staff members engage students with current best practices including social-emotional learning, guided reading, readers' and writers' workshop, real-world math and inquiry-based problem solving, and science and social studies applications.

At Woodrow Wilson School, we place an emphasis on literacy and helping all students develop a love for reading and writing through a balanced literacy approach. Teachers use various diagnostic tools, including baseline and culminating tasks within each reading and writing unit of study, to regularly assess students and ultimately individualize instruction. Readers' and Writers' Workshop models can be found in our classrooms, and students work consistently to analyze their reading and strengthen their writing with strategic use of text evidence. Students also benefit from our implementation of Response to Intervention (RTI). This approach identifies at-risk students as early as possible and provides us with an array of tools and options to ensure student success. In addition, we offer an Extended School Day Program, designed to further strengthen their comprehension skills and reading fluency.

Woodrow Wilson has also partnered with the Civic League of Greater New Brunswick to host an after school program available to 5th, 6th, 7th and 8th grade students that includes enrichment activities across all curricula, as well as building leadership skills. The district's mathematics programs emphasize the development of students' understanding of math concepts and problem-solving skills through day-to-day experiences that are meaningful. Students are encouraged to use multiple methods to foster proficiency and accommodate different learning styles. Students approach math problems through collaborative, inquiry-based learning experiences. The goal of this approach is to build powerful mathematical thinkers and capable problem solvers.

Technology supports a collaborative, interactive learning environment. Students regularly utilize technology throughout the day in all disciplines to enhance learning, conduct research, and demonstrate understanding. Woodrow Wilson has over 400 Chromebooks for student use and every certificated teacher has a dedicated laptop to assist in technology integration. To support the most current instructional strategies, Interactive LCD projectors and Standard LCD projectors are utilized throughout our classrooms. Online resources for literacy, mathematics, science, social studies, and health are utilized throughout the curriculum areas within all grade levels.

6th, 7th and 8th grade students who attend Woodrow Wilson School are invited to participate in Fall, Winter, and Spring athletics alongside the students who attend the New Brunswick Middle School on Livingston Avenue in New Brunswick.

Mr. Michael Chiodo, Principal
